

PRESS RELEASE

FOR IMMEDIATE RELEASE

Part #: 7750

Description: Jeep TJ Front Sway Bar

MSRP: \$375.95

Application: 97-06 Jeep Wrangler TJ 4x4

Hellwig Products released their new front sway bar for the Jeep Wrangler TJ. While they have previously sold front and rear sway bars for lifted vehicles, this part number fills a hole by fitting stock height Wranglers. It fits both the standard and Unlimited (LJ) versions. The Jeep Wrangler, like many SUVs, has a fair amount of body roll even from the factory. This sway bar increases the rate of the suspension for less body roll, better handling and improved safety. It can be used on vehicles driven daily as commuters or loaded up with equipment or trailers for weekend adventures. It is manufactured from 1-1/4" solid, heat treated chromoly steel and all the steel parts come with a lifetime warranty. The 3 hole, forged ends allow the driver to pick between 3 different sway bar rates to match their driving style or the weight of their specific vehicle. Adjustable length, heavy duty end links also allow it to match your exact vehicle.

It matches perfectly with Hellwig's 7684 rear sway bar. See the chart below for all of Hellwig's Jeep Wrangler TJ products.

Product Attributes:

Powdercoated Steel Components

Polyurethane Bushings

3 Hole Adjustment for Rate Tuning

Adjustable Length End Links

Heat Treated, 1-1/4" Chromoly Steel
